

olé^{XL} Film Interactive Touchpad with 2.1" OLED Display

Olé, Olé. Olé™, the world's first Film Interactive Touchpad, ushered in a whole new era of customized control. Now, Olé XL offers yet another affordable, ground-breaking option for personalized control of your multi-room A/V system.

Customized Control. Olé gives you the power to customize each touchpad with the level of control you desire in each room for every user.

The Perfect Fit. With hundreds of beautiful décor-matching combinations to accommodate every room and every taste, the Olé family of Film Interactive Touchpads has the perfect FIT for you.

The Personal Touch(pad)

In 2006, Olé turned the custom A/V industry on its ear with its patent-pending combination of touch screen functionality, keypad-like simplicity, affordability, and unmatched customization. Now, with the addition of Olé XL, there are two best-of-breed options from which you can control all your house-wide entertainment.

Every Olé Touchpad in your home can be customized with an inspired collection of slide-in films in a variety of colors, styles and themes. These beautiful, photographic-quality films slide easily into the touchpad, transforming each in-wall controller into a work of functional art that enables easy, intuitive control of your multi-room entertainment system.

Expanded Control

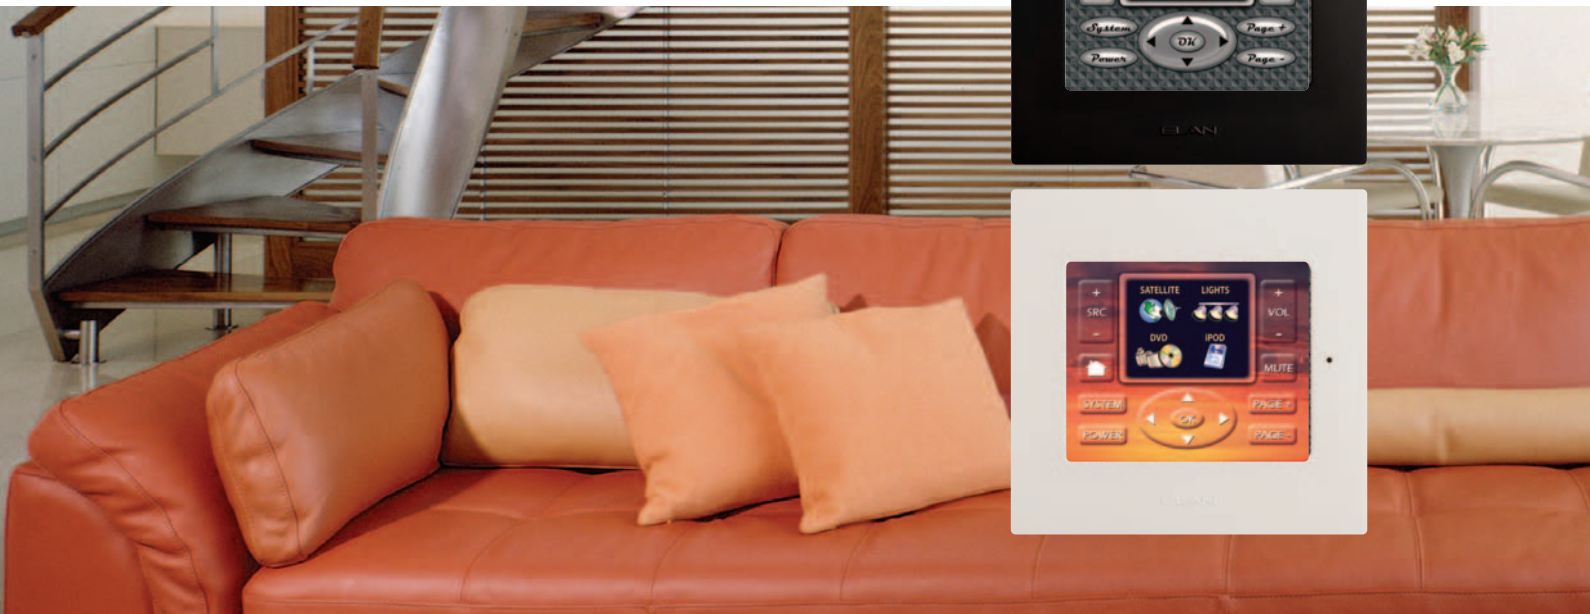

Olé XL offers expanded customization of control and feedback through its 2.1" OLED display. Additional buttons, with icons or text, can be arranged on the display to provide more control options such as multiple source select pages, numeric keypad and DVD/DVR menu navigation. The larger display also provides more detailed graphical and text "Now Playing" information from source components such as iPod® and XM™ Radio.

It's a FIT

Not a touch panel; much more than a traditional keypad; Olé is a completely new kind of in-wall interface that combines all the speed, response and color graphics of an LCD touch screen with the simplicity and

incredible price of a keypad. Olé is a Touchpad –and a FIT– anywhere and everywhere in your home.

From the mountains to the beach; from gemstones to football; Olé and Olé XL designer films and décor-matching wall frames allow you to express yourself with hundreds of different combinations. Wall frames are available in two sophisticated styles, Standard & Euro, and come in seven different colors: White, Light Almond, Almond, Ivory, Brown, Black and a beautiful Satin Chrome finish.

Olé^{XL} Film Interactive Touchpad with 2.1" OLED Display
