

# VIA!® 4.0

## 4-Inch Color Touch Panel

Enjoy VIA!® Performance...

Just like its award-winning big brother, ELAN's new, smaller VIA!4.0 4-inch color LCD Touch Panel gives you fingertip control of all your audio, video and house-wide systems.

In a Space-Saving Package...

The VIA!4.0's small, unobtrusive footprint allows it to be installed just about anywhere, particularly in locations where space is at a premium.

At an Affordable Price!

The VIA!4.0 provides an incredibly affordable step up from in-wall keypad controls to a full-color, easy-to-use, graphical control. It's perfect for every room in the house!

## Control It ALL! ■

### Award-Winning Features

The VIA!4.0 has all the features that made the time-tested, award-winning VIA!64 one of the best-selling in-wall touch panels on the market today, including one-touch access to your audio and video, lighting, temperature and security systems, real-time video monitoring, customizable layouts, room-matching screen motifs, ease of programming, and more!

### The Perfect Solution

Depending upon your individual needs and space requirements, this sleek 4-inch full-color touch panel is the perfect solution. It provides the opportunity to either affordably step up your control solution from standard in-wall keypads, or provides graphical control in spaces where the larger VIA!64 either will not fit or where price is a consideration. Stepping up from a keypad to a new VIA!4.0 also means that viewing everything from security cameras to the morning news is now available just about anywhere.

### Flexible, Universal Control

The VIA!4.0 is highly flexible and is compatible with every ELAN multi-room controller product. It also can be used in most any home system that you may have, even ones made by other audio/video manufacturers. By storing Infrared (IR) commands inside this product's memory, this truly universal touch panel can control just about anything that responds to IR commands, such as your TV, DVD player and more.

### Easy to Program

The beauty of the VIA!4.0 is that while it's a whole new product, it still uses the same programming routines and tools as other ELAN panels, saving ELAN Dealers time. The VIA!4.0 uses VIA!TOOLS, the tried, true and familiar software ELAN Dealers have been using for years to setup VIA! panels and keypads. For the Customer, this not only translates to time and money saved, but the high level of confidence and reliability of a job done right.

WOW! It's a Mini VIA!
