

VIA!®dj Series II

Digital Music Servers

Now with Windows® XPE Operating Systems

VIA!®dj II

Four outputs for listening to different songs in different rooms at the same time. 160GB hard drive stores over 3,500* hours of music!

VIA!®dj-s II

A single-output version of the VIA!dj II for house-wide enjoyment of your entire music collection.

VIA!®dj-hc II

Four outputs for independent multi-room listening and a 400GB hard drive that allows you to record and enjoy nearly 9,000* hours of music!

There's a New DJ in the House! ■

Introducing the newly enhanced family of Digital Music Servers from ELAN — VIA!®dj Series II. All 3 models have been updated with new and exciting features, making the best-selling line of Digital Music Servers on the market even more powerful!

Windows® XPE

Driving this new rollout is VIA!dj II's new operating system — Windows®XPE. Faster, more powerful, and with unmatched reliability, this new OS has allowed us to add dozens of asked-for features into the updated product and bring to market the most feature-rich line of digital music management systems available today.

Feature Rich

All the award-winning features of the original dj line, like Digital Jukebox, 20x ripping speed, customized playlists and the unsurpassed user interface displayed on VIA! Touch Panels around the home, are still there.

Yet Series II VIA!djs offer even more — on-line feature upgrades, an easy-to-use

PC/MAC user interface, simple back-up & restore, WMA file support, browsing by track, era and year, faster playlist creation, user-defined genres, an enhanced iPod® interface that uses your iTunes® library to view the content of a VIA!dj's hard drive and easily transfer music to your iPod, plus much more!

3 Models to Fit Your Needs

ELAN offers 3 VIA!dj II models to meet your needs and lifestyle. Feature-wise, all are identical. The differences lie in the number of audio outputs and

the size of the hard drive. Want to listen to different songs in different rooms at the same time? The 4-output VIA!dj II or VIA!dj-hc II is for you. Want to reap the benefits of digital music management, but playing one song at a time throughout the house is just fine? The single-output VIA!dj-s II will fit the bill.

VIA!dj II and VIA!dj-s II offer 160GB hard drives — enough for over 3,500* hours of your favorite music. Need more? The VIA!dj-hc II, with its new 400GB hard drive, provides nearly 9,000* hours — enough for even the largest music collections.

New Double Warranty!

We are so proud of the new Series II VIA!dj's quality and reliability that we have doubled the warranty from 1 to 2 years!

Faster, more reliable, more features, more models to choose from and a 2-year warranty. ELAN Series II VIA!djs clearly set a new standard for digital music management and entertainment.

All 3 Models

- Fast, easy access to your entire music collection from VIA!® Touch Panels and TVs throughout the home
- View CD cover art
- Digital Jukebox – add and play songs in the order you enter them
- “Quick Add” feature allows you to add tracks to a playlist “on the fly”
- “Preset” feature for quick access from keypads and remotes
- 20X ripping speed from on-board CD tray
- Download cover art and CD info from the Internet
- Import your own cover art
- Windows XPE operating system — **NEW!**
- PC & MAC User Interface - control your VIA!dj II, edit content and import cover art from any networked PC or MAC using the built in web-browser interface — **NEW!**
- Drag and drop audio files from any networked PC or Mac — **NEW!**
- Enhanced iPod interface - use iTunes to view the content of a VIA!dj's and transfer music to your iPod — **NEW!**
- Enhanced browsing capabilities – browse by track, era, year and alpha-numerically in addition to artist, CD and genre — **NEW!**
